Dear Bundu NetworX Users,

The Bundu NetworX family would like to congratulate Brian & Evelyn on the birth of their daughter, Adeline. As planned, Brian is spending some quality bonding time with his family.

This coincided with the restructuring and upgrading of many new things for Bundu NetworX.

We have been listening and we recognise that Bundu NetworX has grown substantially with all your help and support. We are very proud to announce that Jackie has been appointed to CEO position. Jackie brings with him new blood, new ideas and 100% dedication and enthusiasm to the goals of excellent service and a stable network.

We also would like to introduce three other staff members who have joined the team.

- Sli Sikhosane has joined our network technical team.

- Stuart Robinson has joined computer repairs and support.

- Andries Pretorius has been appointed to head up our new Pastel Accounting support service which we now offer, along with network and I.T. support.

Natasha has moved into a more technical position to assist Steven with telephone support. This means that Natasha's position is now available.

HELP US... We are looking for a front desk receptionist who is outgoing, efficient, friendly and caring, no experience is required. We are looking for someone who might like to advance over time into other areas of the business. If you think that you, or someone else, might be suitable for this position, please give us a ring.

The office is going through a revamp as well. This construction is totally geared at upgrading the customer experience and professional image. Please bear with us during this construction. This is something that is long overdue, but it does mean disruptions and yes, using the back door into our offices.

On the question of network stability, crime and nature have been our biggest challenges. We have upgraded security at the high site that was susceptible to crime over the December period. Then, there have been other incidents of ant invasion into equipment, and baboons using a high site as teething toys and a jungle gym. Overall the score card gives us an average of 3 hours down time per incident. Of course none us look forward to these moments and we want you to know that we do all we can at the core to keep the network up running every minute of the day.

Your Bundu NetworX Team

Kind regards
Jackie Momberg
